Data notes:

- Used mean for salary reported as range (i.e. 60,000-70,000 was treated as 65 k )
- Deleted couple responses with uncertain yearly total (e.g. freelancing at \$XX per hour)
- Deleted couple responses that appear to be from people outside progressive data world, based on job description or organization type
- Years in data have been rounded to nearest whole number
- Pay raise/time on job grid was a survey design failure, so we're not reporting results
- Job titles were bucketed
